

KEEP THE OUTSIDE, OUTSIDE

Our Heavy Duty Screens are developed with our strongest screen bar technology creating a more rigid screen that can better withstand higher wind loads compared to traditional screens. This increased strength, combined with an easier installation and removal process make our Heavy Duty Screens a great addition to any home project.

Better performance while maintaining our classic, stylish look. While not identical, our Heavy Duty Screen has a similar design to our standard model.

Choose from factory white, tan or black colours. Our new factory black option on screens extends the colour durability when compared to painted screens and keeps your windows looking stunning for years to come.

Heavy Duty Screens are available with Supreme Casement and Supreme Awning Kohltech windows
